"Above and Beyond the Human"

Today, I will talk about the concept of Tzaddik. This short talk will be correlated to another talk I will give today about the Transhumanist message transmitted by the Sophia robot. The term/concept of Tzaddik is essential to your vocabulary if you wish to understand, in depth, the nature of Transhumanism and the ambitions of its program for the human species on this planet. Let's go.

The opportunity for this talk was given to me about a week ago by an article I had just written for New Dawn magazine to be published in their print magazine as well as online. I have written a few articles for New Dawn over the years. I had forgotten that I had written this one but it came to mind in the context of the whole vaudeville carnival staged around the AI robot, sophia. I had called this article "The Transhumanist Lie" and its central point was to highlight the connection between today's transhumanism and an ancient sect of the Middle

East. Its purpose was to deconstruct the extravagant claims of Transhumanism - in terms of what is possible today.

Today, the claims that are being made - and what can actually be accomplished in the context of Transhumanist goals such as robotics, cybernetic uploading of human consciousness into silicon-based machines, merging the human creature with a mechanical Artificial Intelligence apparatus, etc. - are very recent in that they are totally dependent on technology. And so, when technology emerges, it will be able to provide - according to what some claim - humanoid robots that will be able to go far beyond anything a human being can achieve. And that is when the inclination to promote this technology will begin. Some people claim that this inclination is irresistible. It cannot be stopped, reversed, or resisted. End of quote.

I totally disagree with all this gibberish as you will see in my next contribution on the internet. There is a hidden narrative behind the technological trademark of Transhumanism as it is presented today. You can perceive it, more particularly, in the Sophia robot which is, at the moment, on its official world tour. This machine is on an official world tour! This robot speaks to people in auditoriums, answers interviews - and it is all filmed and put on the internet. This massive propaganda program that emanates from the Transhumanists - and that they are orchestrating today - is based on a narrative. But this narrative, as for it, is not at all recent.

What I wanted to emphasize in the article for New Dawn is that the narrative founding Transhumanism - and AI robotics, the replacement of human beings by machines and the superiority of computer intelligence in relation to human intelligence, etc. - can be traced back to a particular sect, a specific religious cult in the Middle East. And the name of this sect is "Zaddikim" - that is, those who are members of the Tzaddik group and denomination.

This term, Tzaddik, which is a fundamental term at the heart of the Judaic religion - as well as at the heart of the esoteric practices and metaphysics of the Kabbalah - is spelled in various ways. It may begin with a z or a tz. And the term Tzaddik refers to one of the letters of the Hebrew alphabet that corresponds to the Tarot card called the Star, which I believe is card 18. I'd have to check, and I seem to recall that Aleister Crowley placed it as card 17 in his little shake-up of the Tarot deck. Now, I don't advise you to rush out and find a Tarot deck and study the major arcana, minor arcana, etc.; that is not necessary to understand what I am trying to express here. And you may stumble into a lot of rabbit holes - gloomy and tormented.

Suffice it to say, for my purposes today, that Tzaddik refers to one of the 21 letters of the Hebrew alphabet, and that this concept has many occult correlations. There is a whole dimension to the concept of Tzaddik that most researchers deny - who have been studying Kabbalah and the occult for many years. And I know people who have been in

Kabbalah and Tarot for 20 or 30 years, all their lives. In fact, they neglect an essential and fundamental aspect of this mythological theme, Tzaddik. So I'm going to focus on everything that is not usually revealed to you about Tzaddik. By the way, New Dawn never published my article and they refused to have any conversation with me as to why they refused. I walked out of their screen, so to speak, and you will probably understand why - after listening to the message I wanted to get across.

The point I am making is that the origin and archetype of Artificial Intelligence can be seen in the character of Melchisedec.

Melchisedec appears in the Old Testament as a key figure who comes to the Hebrew patriarch Abraham and, in effect, assigns to him the mission and identity of the Hebrew people. Thus, the mission, identity, purpose and program of the Hebrew people have a real origin in this mythological figure called Melchisedec. Please consider that this name, Melchisedec, derives from Semitic terms: Melchi, of Assyrian or Sumerian origin, which means prince, and Tzaddik. Another variation of Tzaddik is Tzedek. But whatever the various variations of this term, its essential meaning is the same.

So how can we translate it? By "the Supremes", not the "very Good" but the "Best of the Best" - "the Supremes"! The purest, the supreme, those who are above and beyond the human standard. So Melchisedec represents an agency, a super-human

entity. And it is clearly detected, in such a way, in the Old and New Testaments - it is not a mystery. If you know where to look, if you are a good detective, if your probative faculties are developed in a functional way, you will find it. So I will not reiterate the content of my article, but in the description I present a link to a passage in my Lexicon that describes, extensively, the Zaddikim.

The Zaddikim, as a religious phenomenon, constitute a cult, a sect: they are also called the Sons of Zadok. In the Old Testament you find many references to them. For example, it was the Sons of Zadok who consecrated the first Jewish king. That's also why they are called "the consecrators"-the ones who anoint, who anoint kings. And the subject of the priesthood of the Sons of Zadok is an integral part of the background: its existence is obscured in the conventional presentation of the Hebrew religion and in the Judaic belief system. The identity, faith and purpose of the Jewish people are, in fact, directed by the Zaddikim, but this is rarely expressed.

Thus, the Sons of Zadok are a priesthood in the Old Testament, but this tiny group is not mentioned in the same way as the Levites or the Cohens or the other priesthoods - that is, the other lines of priesthood that are said to have existed at that time - because it is a secret sect within the general spectrum of ancient Hebrew religious culture.

Now I will mention two essential points in the description of the sect of the Zaddikim and the character of the Tzaddik because the Tzaddik is a priest, or rabbi, of the sect of the Zaddikim. It was the Zaddikim who lived at Qumran on the shore of the Dead Sea. Therefore, the Dead Sea Scrolls are the product of their sect. This is a fact that only came to light in the 1990s [translator's note: when these Scrolls were "liberated" from the Vatican's control, around 1995, following an academic scandal triggered by researchers in the U.S.]. I describe this sect, at length, in the first five or six chapters of *The Passion of the Earth*. I focused a lot of energy on the Zaddikim to describe what they were and what they did.

We must therefore first of all mention two characteristics concerning them. First, the Zaddikim, and especially the figure of Melchizedek, are considered to sit behind Christ - and therefore considered to be greater powers than Christ. Because Christ is just an abbreviation: it's a title, not a name. It is an abbreviation of the Greek word "khriein" which means "to anoint" - from the Proto-Indo-European root "ghrei-" which means to rub, to coat. Therefore, Christ means the anointed one, who received the anointing. I have explained many times, in my book and in my online essays, the following point: for a person to be anointed, there must be an anointer, a "consecrator" - a "sacrificer". And the power of the anointer is always greater than the power of the anointed - by far.

In Hebrews 5, Paul - Saul, the New Testament apostle - makes it clear that Melchizedek is the priest of Christ. As he says elsewhere: *"You are a priest forever, according to the order of Melchizedek. This is he who, in the days of his flesh, having offered up prayers and supplications with great crying and tears to him who could save him from death, and having been heard because of his piety, learned, though he was a Son obedience by the things which he suffered, and who, after being raised to perfection, became for all those who obey him the author of an eternal salvation, God having declared him a high priest according to the order of Melchizedek", etc, etc.*

In other words, Paul explicitly states that the power of the messianic figure Christ to be the agent of eternal redemption does not emanate from Christ, nor does it emanate from God the Father, Jehovah. This power of Christ is conferred by Melchisedec. And in another passage of the New Testament, again in Paul, in Hebrews 7, verses 2/3: *"For this Melchisedec, king of Salem, priest of the Most High God, who met Abraham when he returned from the defeat of kings, and blessed him, and to whom Abraham gave a tithe of all things, who is first king of righteousness, according to the meaning of his name, then king of Salem, that is, king of peace, who has no father, no mother, no genealogy, who has no beginning of days and no end of life, but is made like the Son of God, this Melchisedec remains a priest for ever. This is a description of Melchisedec.*

In my article, I emphasized that it is also the description, in modern terms, of a clone, or a robot. Without father, without mother, without beginning of days nor end of life. This description of Melchisedec fits the description of the robot sophia perfectly, doesn't it? One could say that in the Sophia robot - a creation of modern technology dating back some 50 years - there is a perfect illustration, expression or extrapolation of the Melchisedec character who is a kind of clone/robot that does not live according to the lifestyle of other creatures. The sophia robot lives with an artificial life form, such as Melchisedek - the Prince of the Righteous - the supreme figure of the Zaddikim sect - *and also the supreme guardian angel of the State of Israel... in case you weren't wondering!*

So with the character of Melchisedec, according to the Old Testament, you have a narrative about a superhuman being, a non-human, superhuman being, who appears to a member of a particular tribe, the Hebrews, gives them a particular mission and gives them their identity - which is the identity of the Chosen People. Intrinsic to this identity, and intrinsic to this mission from Melchizedek, is the encouragement of the Chosen to perceive themselves as superior to all other tribes and variations of humanity.

Thus, the germ of racial supremacy and master race ideology originated with the Zaddikim. I have made this point many times in my writings and talks. It is an irrefutable point that is proven by the facts. Once

you have grasped this point, don't look any further. You don't need to look anywhere else: you have the fundamental clue to what is wrong with the divine experiment on earth.

What is wrong is the intrusion of an extraterrestrial mental process that Castañeda called "an alien installation".

Melchisedec introduced an alien installation into the minds of the Hebrew people, and this alien Archontic mentality - which has actually infected the brains of these people in a physical and palpable way, and which could be detected if the proper procedures were used - has incubated in this particular little tribe of Armenoid Turco-Arabic individuals called the Hebrews. So there is a neurological mark, a racial and neurological signature of the Archontic factor in this people. And it is this Archontic factor, operating in an epigenetic mode - remember this concept well - it is therefore the Archontic extraterrestrial mentality, operating in an epigenetic mode, which develops into an ideological complex: the ideology of the master race. Tzaddik is the root of the master race ideology which originated about 3000 years ago, more or less.

And if we come back to today's period, the Tzaddik is also the concept, the notion, that drives the robotic technology and the integral program of Artificial Intelligence - which is nothing but one of the fronts, and it has several, of the Transhumanist

movement. And, today, this Transhumanist movement - whatever its technological glitter and whatever its disguise - is nothing but the continuation of the ideology of the master race of Zaddikim. And nothing more. Today, it taunts you with all the evidence. *And expressing itself through the Sophia robot, the Transhumanist message informs you, basically, that you are on the way to extermination.*

The extermination of anyone who does not belong to the higher strains of this chosen/elected racial group by Melchisedec is an eternal theme in the life of the Hebrew people. It is an eternal theme and a foundation stone of the Judaic religion and the Jewish faith - as they are commonly called. The current President of the United States has told the world, publicly, that he stands by the Jewish people and that he respects the "Jewish faith". And what is the nature of this Jewish faith?

The Jewish faith is a gigantic deception because in fact a large proportion of those creatures who embrace the Jewish identity, the "Posajis" - people of self-assumed Jewish identity - do not know at all what I have just told you. On the other hand, the central group of rabbis who, so to speak, direct the destinies of the members of the Jewish people, know all this very well. And this is mainly the Chabad-Lubavitch group of rabbis. They are the ones with the black beards and hats that you see dancing around the tables with the president of the United States, who strut around with the heads of

state of other nations, who sit behind the big banking system of the IMF, the Rothschilds and the whole criminal financial mafia. This group of Chabad-Lubavitch rabbis have this program as their essential narrative. So I would deduce from this, speaking as a detective and criminologist, that it is very likely that those behind the Sophia robot are the same. Those who control the Transhumanist movement are the Zaddikim.

I have more to say, in the immediate future, about this issue of racial supremacy and master race ideology. Those of you who have been following my Gnostic investigation of the Mandela Effect will recall that I discovered, in the selected clues presented by the Mandela Effect, three Super Aggregates. The first was the Ford/Volkswagen Super-Aggregate; the second Super-Aggregate involved: "I love Lucy", "Snow White", "*Mirror Mirror, who is the most beautiful*"; and the third was the Vampire Super-Aggregate. And what I have demonstrated in this 68-talk investigation is that there is a message being conveyed to the world through these clues, not in all cases of the Mandela Effect, but only in those that could be considered valid and verifiable based on the records - and those that are encoded in a particular mode.

So the analytical expertise that I invited you to use in this investigation was to discern these clues that are encoded and to extract the encoded message. Part of that message, in the Ford/Volkswagen Super-Aggregate, was about the master race and the

genocide program. If you adopt a master race ideology, you cannot not have a genocidal program to go along with it. The two are identical. I have demonstrated in palpable, concrete, verifiable terms - using authentic evidence - that the cluster of clues surrounding the Ford/Volkswagen Super-Aggregate points to the master race threat. Today, I am revealing this threat from a different angle.

The Sophia robot goes around the world. It's funny, charming, beautiful! There is already a video clip about the Sophia robot saying such crazy things! Such a charming and joking robot! And he/she/it is there on the stage chatting with people, giving his/her/its opinion about the future and how robotics will create a world in which nobody will need to work anymore because robots will do all the work.

All this is Transhumanist hysteria. And behind the scenes of this Transhumanist hysteria - which is presented in a frivolous light through the star sophia - an ancient, vile, murderous and genocidal program is being orchestrated. A program of extermination, not only for you and me, as living creatures, but for everything that lives, authentically, in the miraculous matrix of this planet. Biophobia - the hatred of Life - is characteristic of the Zaddikim. Can you think of any other race, or religious cult, in the world that has ever generated more than 600 specific rules of physical hygiene and diet? This is an example of biophobia, of an unhealthy obsession with never being in direct contact with the raw and juicy reality

of Life. A similar propagation of demented taboos and biophobic incantations can be found among Muslims.

But the Muslims, those who adhere to Islam - and the Christians, too, in their own way - are simply ricochets, branches, of the Zaddikim's program. And they were created by the Zaddikim. Christianity and Islam are, strictly and intrinsically, creations of the Zaddikim. And I have just given you proof of this, but how many Christians in the world today will deny this. They will answer that *"the Jews are the synagogue of Satan and Christ warned us against them"*. Surely. And that *"the loving Father of the New Testament is not the same as the cruel, genocidal monster of the Old Testament"*. All of this theodicy, all of this ideology, is the result of cognitive dissonance due to this alien mentality operating through Christians on the one hand and through Muslims on the other.

In order to move towards the conclusion of this talk, I would like to mention, if I may, two very concrete aspects. But, in conclusion, it would not be correct of me, as a Gnostic Teacher, not to offer you a powerful warning. If you go to study the Tarot and the inclusion of the letter Tzaddik and the theme Tzaddik in that Tarot - or in any other occult esoteric system such as the Cabal's Tree of Life - you will find that you are going to inflict upon yourself a horrible exercise in intellectual masturbation. And I would advise you to stay away from it. You don't need to know what the cabalists have said about Tzaddik.

I'll just read a passage to give you an example. Here is a commentary, by Rabbi Aaron Raskin, on the meaning of Tzaddik in the Kabbalah: *"The drawing of a tzaddik is a yud above the letter nun. One interpretation of nun is that it is equivalent to "ona'ah" meaning "duplicity and deception". By nature, most of us mistakenly think that it is the physical world that is the source of ultimate truth and pleasure. But the yud, or Divine intellect, is added to the nun to teach us that the material world is ephemeral and not the source of ineffable goodness and joy. Thus, there must be something truer and more divine for us to focus on. This higher purpose is the essence of the tzaddik.*

This is a totally misguided direction and this short passage of commentary confirms - and conforms to - the eternal condemnation of Gnostic teachings that have prevailed throughout the ages. All religious schools, in fact, condemn the Gnostics for the same reasons. And it can be proven that this accusation is groundless. For example, the commentary here refers to the misunderstanding of the natural world as the source of ultimate truth and pleasure. Are you under the yoke of this misconception? Did the Gnostics of the Mystery Schools wrongly teach that the natural world is the source of ultimate truth and pleasure?

The Gnostics of the Mystery Schools taught that the physical world in which we dwell - the Planetary Biosphere - is, in fact, a metamorphosis of the Goddess of Wisdom Sophia. And we are, in her body,

according to the mode by which she conceived us within a divine experiment which consists in the flowering of the highest qualities of love, intelligence, freedom, beauty, ecstasy, pleasure. All these qualities constitute our privilege and our birthright as a human creature, as a Rhome. This is our privilege as Rhome.

And every time a religious oddball - such as Rabbi Aaron Raskin - comes along and tells you that the world is an illusion and matter is evil and that there is a higher standard to be reached, you know that you are being scorned, deceived, trampled. And you know that the intention behind this message is to exterminate you. Simply put. Understand that the Gnostics never taught this: they were wrongly accused of teaching that the material world is evil and must be rejected because it is the fruit of the Demiurge Yaldabaoth. They never taught this: it is pure disinformation that has been superimposed on the authentic Gnostic message.

So you can see that the hysteria and the ideological scam about Tzaddik are strictly correlated to the essence of the Gnostic message. And the intention behind the Tzaddik teaching is to say that there is a voice of spiritual authority in the world - emanating from the Zaddikim and only from them - which represents a higher standard than the human standard of normal life of a creature living in Nature and its material world.

The Zaddikim exist on a higher level. They embody a higher standard that is above and beyond the human standard, above and beyond ourselves. And from this position of superiority and supremacy, they judge humanity, they judge all the other tribes, they judge the Goyim. And they assume, too, that they must guide and instruct them in a truth superior to reality. This is the lie that lies at the heart of the ideology of the Zaddikim and it is also the lie that operates at the heart of the ideology of Transhumanism. Indeed, what do Transhumanists like Ray Kurzweil - whose name means the vile curse - want today? Pay attention to homophones, even across different languages. The vile curse of the Zaddikim. The vile curse of the Supreme Jews.

Now I would like to inform you of a very important point before I conclude. The term Tzaddik can also be translated as "righteous". For example, a novel was published in 1959 in France, entitled "Le dernier des Justes" - by the Jewish author André Schwarz-Bart. And the Righteous One, or the Righteous Man, is another translation, another rendering, of the term Tzaddik. They are not "just" the Best, the Supreme, above and beyond any human standard - namely, embodying the standard of a superhuman, extraterrestrial entity, Melchisedec. But they are also "the Righteous," the only ones who can dictate what is right and who can prescribe and enforce justice. Everywhere you look today, you will discover that the Xenosh are doing just that: they are stepping in as a third party organization fighting for good and defending human rights and justice. Isn't that so?

But Justice is a lie: there is nothing that can be called Justice. Justice is a lie and a complete illusion. There is revenge, revenge, certainly: these actions are real and palpable. But there is no such thing as justice: it is a delusion that emanates from the duplicitous alien mentality of the Zaddikim.

From the point of view of the Transhumanists, if I could speak for them in conclusion, they would probably say that it is "just" that humanity be exterminated because the course of the human species, due to its intelligence, has reached the point, thanks to the fusion of knowledge and technology, of creating robotic machines endowed with artificial intelligence, and more intelligent than itself. It would therefore be cosmic justice if robotic creatures with artificial intelligence replaced and eliminated their creators. This is Justice. This is the kind of Justice that Transhumanists promote.

I'll leave you with that caveat and I could say a lot more. And for my last piece of evidence supporting my case, please let me refer you to the direction I gave at the end of the Mandela Effect investigation. I said that the Mandela Effect would fade during November 2018 and so it was. The Mandela Effect is over. There are no authentic effects being carried over at all. There is a lot of collateral, psychic, emotional damage that comes out of people getting involved in the Mandela Effect without being able to find a way out of it. Sad to say. I indicated that the empowerment of the Goddess of Wisdom Sophia, who generated the Mandela Effect, would transform

its modus operandi and continue to operate in a different mode. What is the difference between the way the Aeon Sophia, the Planetary Animal Mother, is working now to get humanity's attention and the way she did in the early manifestations of the Mandela Effect?

In the Mandela Effects I investigated, you discover clues that come to your attention through anomalies, in movie dialogue, in the names of cereals, in representations of emblems and logos - trivial and popular things. In the present phase, since November 2018, you no longer see that. What you are seeing is that Aeon Sophia is awakening your attention to events that are critical to the survival of her children, the Rhomes. Critical to the survival of the Rhome, of the Anthropos. She draws your attention to events by showing or allowing you to perceive, through your probative faculties, what is encoded in them - what is encoded in the names, actions, places, titles and descriptions correlated to these events. Can you see the difference?

The subject is now the events. And one of these events is the appearance of the Sophia robot as an ambassador of Artificial Intelligence, as an ambassador and emissary of the transhumanist message. He/she is being staged all over the world and appears in hundreds and hundreds of YT clips. And who is reputed to be the genius who wrote the programs that allow these machines to do what they do? It is Dr. Benjamin Goertzel. I've said before, and I'll say it again in this little talk, that the name

Goertzel encodes what you need to know about who this individual really is and what his real program is. When you can decode the names of events, places and people, you can then perceive the program at work through them. This is how the Planetary Animal Mother, the authentic Sophia, not the artificial Sophia, is guiding your mind and your life today.

So the name Goertzel is composed of the strange root or phoneme Goe which is also found in the word goetim, meaning low magic, decadent magic, namely magic involving the invocation of demonic forces. It comes from the Greek word "Goes", meaning a low-class sorcerer, (goaô-ô = to wail), an evil sorcerer, a bewitcher - plural, "goetes". Please compare the Greek word "goes" with the Greek word "mantis" which is the diviner of the wonders of the natural world. You are the diviner and you practice mantics (μαντεία / manteía). You learn to develop your mantic expertise in order to fight against the operations of the goetes. And at the end of these operations, you find Benjamin Goertzel. And you will note that the "tz" is present in Goertzel's name and that the root "El" is a Sumerian root, adopted by the Hebrews, which refers to the Highest, the Most High - El/Elyon. It is a reference to Melchizedek and the individuals in whom Melchizedek invested the duplicity of racial supremacy. They are not racially supreme in any way, but they have only one intention, and that is to convince you that they are so as to defeat you before the battle is even initiated.

But the Gnostic Teacher is here to tell you, on the internet, that the battle has just been initiated. Don't let yourself be convinced - by the hysterical, carnival-like propaganda of the Sophia robot - that Artificial Intelligence will somehow take over the planet and exterminate humanity. That is my final message for this talk.

Perceive the obvious and live in Correction.

December 19, 2017.
