

Working the Math regardless

Sabrina Wallace Okay. So the the biggest chunk of what's slamming me back and forth like this is the lack of desire to actually help anybody with tries the truth or class. And the people who are paid to talk, they're going forward with the narrative driving, which is going to end up being whatever it ends up being. It's narrative driving. It's what they're going to go for to dump people into pockets of use. And I'm trying to stay out of it, but I'm not going to sit here and pretend that I don't understand what you're doing. You're going to make your spaceships have a fake space war, and in order to do that, you need human bodies. It's disgusting that that's what it is. Now, the people that all believe in star seeds and spaceships, they have no time for my mouth because they don't want to hear in any way, shape or form that they're not going to Mars and that what they've been told in their military, whatever, or vendor company or whatever is not true. So forget it. Then you have a bunch of young people who are drone operators and they're doing their jobs defending the world. And they know as well as I do that even with all the shielding in the world, if you get a laser beam directly microwaved on somebody, you just bake that person from the inside out. I'm telling you now, folks, those of you that are not fully buckled in yet, this is about math. And when we get to the metrics of flaying your skin from your bones by the plasma metrics, by the way, for forced morphogenesis, you're going to have to be really tightly buckled in mentally. So you understand that we lied to people about anatomy and we lied to people about material physics for exactly the purposes we're watching right now. Nobody has any fucking idea how our dimension really works. Perfect. Now we're going to take it Hunger Games and terrifying. And nobody's going to stop a damn thing. Our parents, the boomers, and all the rest of them. Speaking for myself at 44, they don't give a fuck. My generation, we were lied to and told Sit there and play video games. Our children were already tortured and harvested. I did everything I could do to prevent my children from suffering. What I did there was me between my own father, my own husband, the Central Intelligence Agency, and all these other agencies and physicians. There were 30 separate offices when I was done, and every single one of them ties back by taxes, tax ID, tax connectivity to the fucking Central Intelligence Agency. Now, that is a fuck ton of people. And I try to get people to understand. I get it. If it didn't happen to you, you don't have a filing cabinet full of medical records that you have to go through. I do. And I have to be accountable when I'm out here talking online, which apparently a bunch of fucking morons continue to think that I'm out here just a little bit. A little, A little. And I'm crazy and oh, I'm scattered and I'm over here going. And you people are in serious fucking trouble. What do I mean? I'm a free range human, and I happen to be fairly intelligent, but I don't walk around thinking I'm the cat's meow. They do, and they use their bio field that's already augmented, or the wireless or a chipset, a headset buried in the left hemisphere. You guys out there that are still bitching about me, you can't even think about that stuff or the product lines. That's your enemy. That's your enemy right now walking out there. Oh, but they could be our friend. We're talking about people who hybridized with artificial intelligence in 1982 that are still doing it. And it's a job. And it's still a job. And you're pretending that it's some small group of angry people and that somehow all these people who just raise your consciousness, these are the people that say that they're raising their consciousness. They're just sitting there. They're just sitting there in a room breathing and being all even energy. How how hard is it to come in with your gear on and take them and their belongings? Yeah. Time to be a realist. All right. So the problem with those of you that know that that's the situation, you look at me and you're confused. I come from the people who wrote the hardware and software for the equipment you use. And what you don't know is that there's an I Tripoli of bio photonics. Or maybe you do know, but you don't understand how it works with someone who's authentically augmented. Body machine interface is not the same as what a lot of you do have, which is brain or heterodoxy, accessible brain machine interface, body machine interface with von Neumann scars meaning it was a full

physical interlace. My whole spine will respond before you can get your single neural synaptic response off by the math. Now, they said that this will be a war between clones and drones and that everybody else who's caught in the middle that wasn't all tied up in all these extra things because they don't want to share their toys bullshit. They're feeding. They're going to get everybody dead because nobody is looking at the biofuel and nobody's looking at the body area network. You walk past somebody, you're done in about 5 hours and you will infect your whole family when you get home. When he told them any of that, they said it will be a three point pulse. You sit in your kill box and wait. Now. I try not to speak out loud. Divisions of people that I hear or whatever, but the ones that I spoke out loud, that's generic. That's who they're yelling about. I mean, China and Russia. And then Russia, which. Alaska. Hello. RA So I didn't see anything. That's unusual. That's your big stretch of people that are up and going. But as far as me, Sabrina. The one that you mentioned, whichever of you in our engine room. Men in black. They get through. Flux density Air Force One think you through. As in, when I say think it through, I mean, who would be talking to those people? All I can tell you for sure out there, those of you that still don't get it and I can hear the confusion. I'm not changing me simply because a bunch of you out there figured out that I was technically telling the truth. Completely, Not partially. And then the rest of you that you already pissed me off permanently. You accused me of being MQ altered or chipped. To me, that's the epitome of disingenuous intellectual ism. If I were chipped, I wouldn't have told you anything. If I were NQ Ultra, I definitely wouldn't have told you anything. That's what I'm pointing out to you. Did Star Dahl, Steve Quale, wrote the stories about the Xenomorphs back in the seventies. Rusty's stars Steve Quale and Mike Adams are the most excited people I've witnessed for years now when they speak about how we're all going to be dead, thanks to all these people who have weapons all around us that we can't even recognize or deflect because we don't know how these weapons work. We don't know how these weapons target other bodies. We don't know how these weapons reload. We don't know anything. Yeah, well, I do, because I survived the testing for a bunch of this. So that's why I share so openly about my body with all the other people out there so that they too can buff up and be ready, because some of them know from listening to what I say, they can go back in their own medical history and go, Oh, I know now what? This is a man. That gives them a chance to defend themselves, maybe their pets and their family. You think people are happy about that? No. I have no friends anywhere. None. The Christians want my mouth sealed shut. They're the most pissed off because they're the most guilty of the Black Awakening and delivering clean American blood because the China already did it with the qigong and the wiggers and all that. Our country is going to be the Deliverance ministries and the star seats. The star seats for the psionic abilities, the Deliverance ministries for the clean Blood. No problem. You people that don't believe in anything other than I'm a good Christian military man who's going to go out there and kill people with your new hovercraft and have redshirts for a fake space war. Same people with academia scientists. Mad Scientist program Engineered biological entities. We made the EBS and someone sent a video. Someone I trust. They said. I think the Grays realized that once they got so far with playing with this stuff, they turn into a gray suit and their cells can't hold electrical acuity anymore. I already said this. Yeah. So then you have your academic people making the EBS and doing all this stuff in regards to organ trafficking, organ harvesting, your perv professors who always want to be fucking young girls or young boys who never leave the university because out in the real world they fail. They can't actually do the trade that they teach about, so they go teach about it with a way that they're paid into that position and they keep an eye on any of the new and upcoming minds and then filter them out from there. These are engineered systems. Then you have people in the middle who say near field effect fear the fractals. They're not doing that because they're afraid of a boogeyman. This is the this is the culmination, the crux right here. If Raytheon, Boeing Skunkworks, if all these electronic weapons did not work, people would have spoken up by now. They didn't. They died. They didn't die

accidentally. And they didn't die in nice ways. Seth Rich. Barnaby. Jack. Aaron Schwartz. We'll be here a while. So we're not honest about that in tandem with the hackers who are doing these these jobs still. And I have to sit here and draw pictures of Nets centric warfare with a line graph. It's so embedded into our psyche to ignore them, killing us with buttons and video game controllers and keyboards. Hey, man, it's my job. It was the job with the Brownshirts. With Hitler. The same Hitler. You all scream and yell about. You're young, you're stupid. You're doing this on purpose because you've never done any work. All you've ever done all your life long is sit with your computer at your desk, which has been taught to you now to be a job e-sports. I got all my trophies on my PlayStation while you were spending hours and hours doing that. What's the state of your home? What's the state of your personal relationships? What's the state of your physical exercise and body development in your immune system? Who gives a fuck? It's not popular to talk about that, right? Instead, it's only popular to talk about whatever the algorithm feeds you. Now we've got a digital twin. Now we have people going. Wait a minute. What's going on? No, we don't. They're all excited to augment, to become gods like they've been promised. So if you start at the beginning. Now, what I pointed out to these groups of people, these are the groups of people that are in their twenties and thirties. They're running the market share and they're running what the world is going to do. Do you think the people that are 300 years old hear me again? 300 years old. Great financial portfolios. They've got the CBR and secure skiffs. Chemical, biological, radioactive and nuclear that's made out of DNA specific stuff, too. And then an algorithms that go with it and different ways that they maneuver around people with peer to peer nano, peer to peer, HPC quasi static. And I've over here is the disabled person going, listen, I don't care that I'm disabled and I don't care that my family members were a bunch of mathematician people that did jobs. I care that I have two children that are not, and I'm going to keep it that way. So I need to be on my toes. I need to be thinking ahead and I need to be real. And then everyone else gets tied up in how I present, what I say when I say what I do. I'm blowing off steam to get through. Is there any sort of empathy for that? Not really. So I decided, Fuck it, I don't care. Then it's. Well, you're a girl. You can't be smarter. I come from that third fastest man in the world who is up at the top. And my mother was up at the top as well, which is a bit rare. Normally, the females in the way things are done, they're not actually intelligent. They're empty. My mother was an architect. Whatever she did, whoever she really was, she was exceedingly brilliant. She was the brains, not my dad. And he was super fucking smart. Now you see that that in me is pulling back because I'm tired of getting kicked in the head, in the teeth. And I have not rallied the people that are circling me right now to defend me because I feel that anybody should be able to stand on their own auspices and defend themselves. But I'm not out here for me. I'm staying out here because I know what this is by the math and the chemistry and the biochemistry. They're not willing to tell anybody because they're at war with each other at the DOD. You'd be Skippy in the engine room. On the telegram. We're going to. We're going to hash this out for real. These projects. And for the rest of you out there that are watching the channel, I'll have the PDF up here as soon as I can because like I said myself in the firewall, we're almost there. I've got sense editions and other things, but I wanted it to be really pretty because I want this to be the one that's sick, that sits there until I finish out with with the folks helping me in the engine room, the different software and double check, I just want a second set of brains to double check what I'm already reading because once I find it, I see it. I know that's what it is, but it's nice to have another series of brains there to take a look at it. And then those of us in the engine room have to discern the nice way forward to not step on anybody's toes in those comms that I mentioned earlier. Rose Why? Because it's really war and that's really crypto and we don't want to be saying that stuff out loud if we can help it As far as what's on the telegram, we'll make it. We'll find a way to make it private and make it disappear. And I'll make sure that I let you guys know over here what I'm hearing so that we can do that. And then, like I said, we'll just keep it nice and quiet so that we can help the lay person. And

for the rest of the people from Russ and everywhere else. Are you kidding me? The international community has more windows around here than the you know who? Maybe that's a hint for the rest of you. Atmospherically as a cheerily scientific tour no one to avoid giving out random to. He had volunteers to a security related terror plot of those through quotidiennement. So they. To retain all these terms to those prosecuted, most of it to most goes attribution. Those three certainly no silica some tentative of said labor, no similar rights data. He should have told people. How could you? Shape shifting people, humans, against their will. Oh, no, Sabrina, we're not doing that. No way. We just did all this transhumanism so that we could have faster Internet throughput. The smart city, faster Internet throughput in a smart city. That's the only reason we did all of this. We didn't really do this to Armin, to a fish flipper or Armin to something else that's more tasty for friends that we've been serving for 300, 400 years. Oh, no. You're crazy. Okay. You do whatever you say. And then and this is the other part for those of you that still are accusing me of my work somehow denigrates God. You're just. You're just fucked up. There's nothing I can do to help you. I tell everybody from the beginning, God is real. That's who saved me. I wouldn't be alive without that period. So then the rest of you that are screaming and yelling from the Illuminati, a cultic side that nobody can handle knowing about this body part. Get the fuck out of here. You guys have been the big component of the problem the whole time. The Christians that are all caught with their ass in the trap because they don't even know about human anatomy. You don't think they deserve to know? Of course you don't. You don't want them to know. They'll kick your ass. And then because they have real faith and connectivity to God and then the star seeds of the energy workers who are pissed at me because I didn't do it the way they think it should be done. Would you get your little asses out there and go do it the way you think it should be done and do it the following way? You see that crazy bitch over there? She ain't crazy. People have written articles about her that know she's telling the truth about the Tripoli. So the aura is not some fake mystical thing. It's a body part. There it is on Zee media in the fourth hour that the. One, two, three. I'm an energy worker now. You pay me for the work that I do when I hear you. Oh, now, wouldn't that be great? There's no more argument whether or not it's real and all that kind of stuff. And then you get your little ass out there with your channel and you do you whatever wisdom you have. Why people need it. The way that I do biofilm work is just one way of how to dance. The way that you do it is another way of how to dance. Did you notice we have a lot of different ways that we dance as humans, and the foxtrot does not make dubstep worthless and the tango does not make swing dance worthless. It's just different ways to move our body of mover ions and electrons. So get out there and do your thing and quit bitching about how I do mine or what I should be doing. And then for the rest of you squatting on the secrets, dark matrons and all the rest of the fear, I'm not afraid of hybrids. And you shouldn't be either. And it's called war, which means it's dirty. And everything that we've been told is probably bullshit because it's called war. So I'm going to go by the molecules and I'm going to go by what type of large teeth are trying to get on the lawn inappropriately or eat my face or not? And I'm going to leave all the Illuminati lying, all the Christian lying, all the star seed lying, all the energy work lying, and the best of all the fucking hacker lying to somebody else to get upset about. We have work to do in on this channel. That's what you're going to see. It's called work. Then you get a PDF, which will be up probably in about an hour and a half. It's 3:18 a.m. now. Yeah, I'd say by 5am should have it up there. I didn't want to be any component of leadership in any of this. I still don't feel that I am. But in the meantime, for whoever and wherever all the boys and boys of toys are and whatnot, let's just try not to step on their dick. Mark 536 I read mathematically crypto was a bit.
